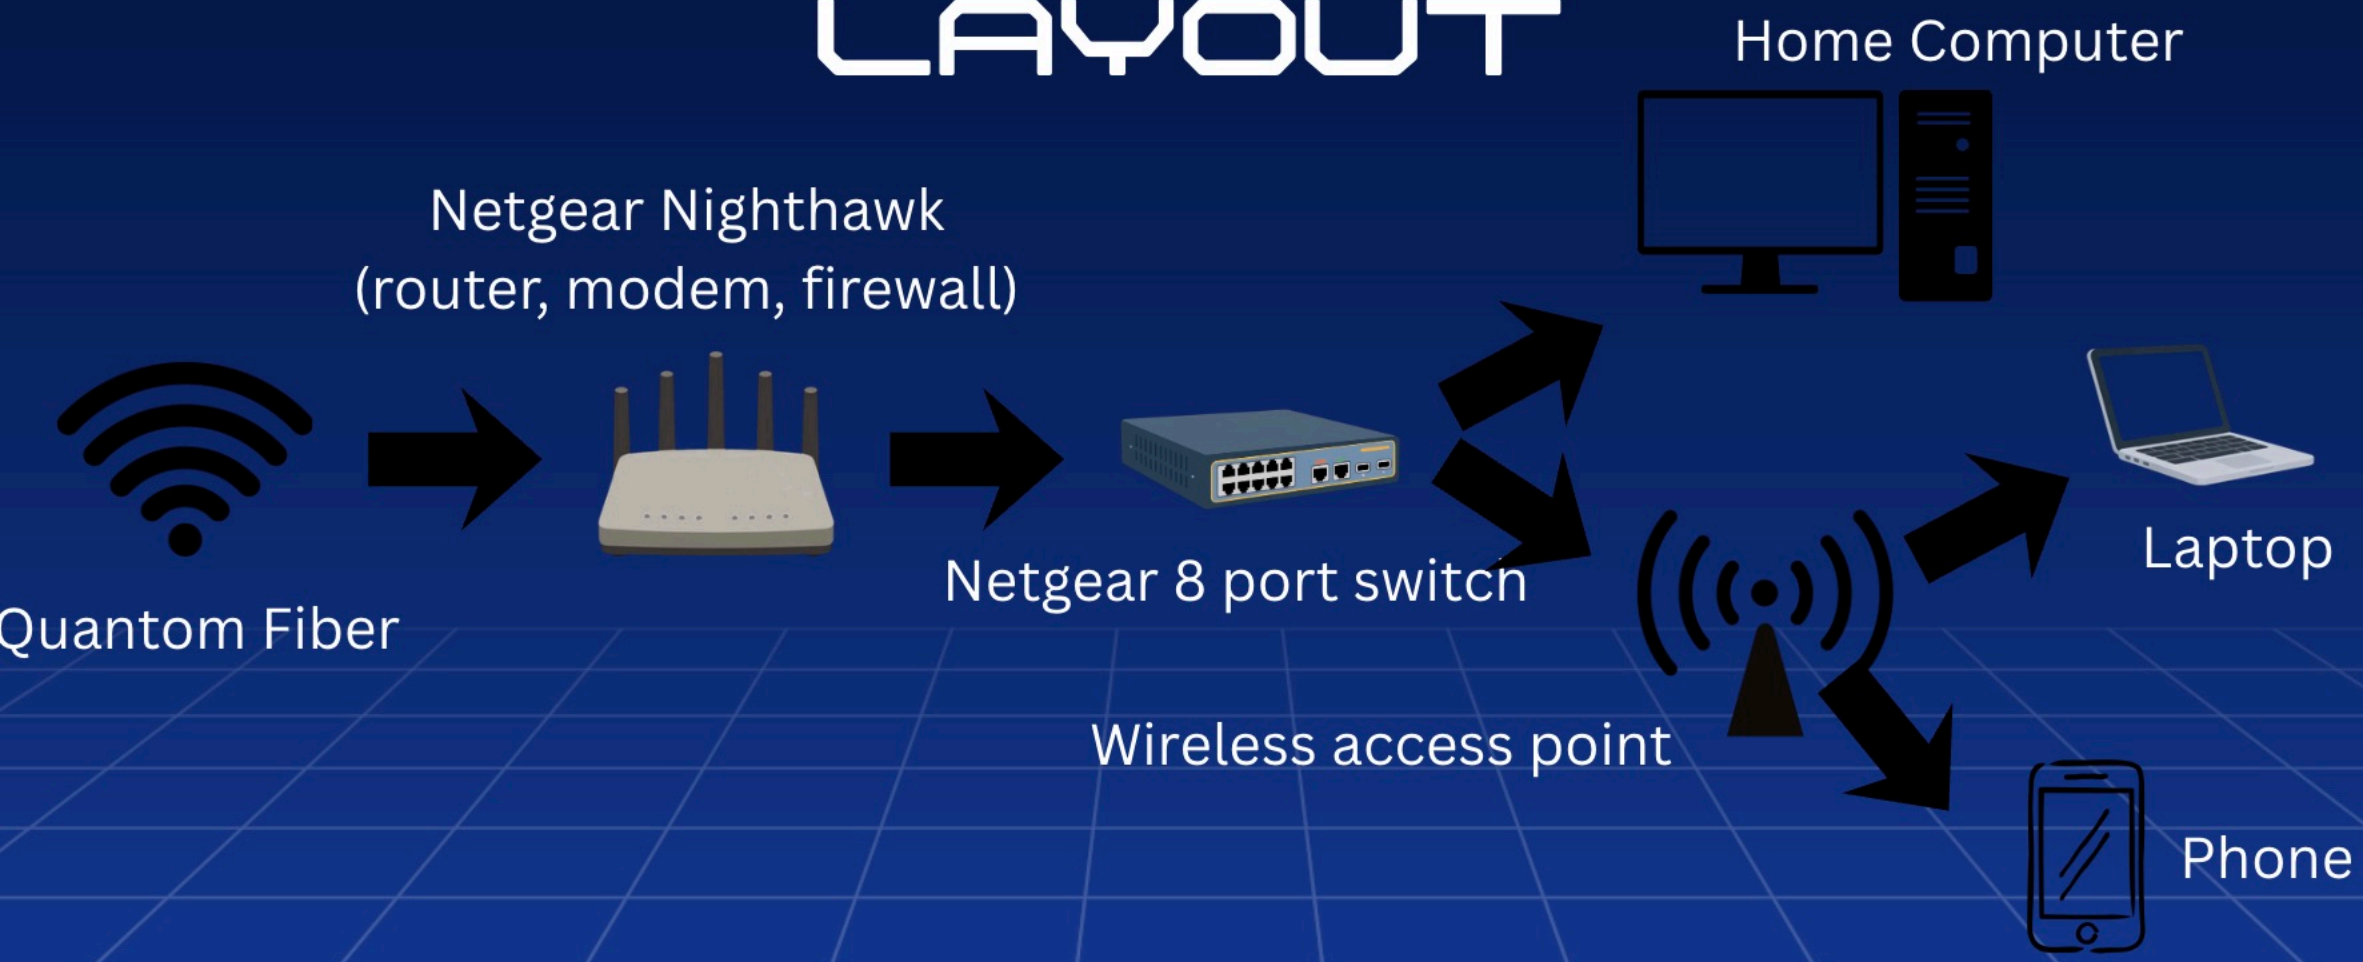
HOME NETWORK LAYOUT



Antivirus Products

BitDefender: lightweight on your system so it won't slow your computer down, and has excellent malware detection.

Intego: supposed to be the best and easiest option for mac users. Built specifically to combat viruses targeted at your Mac.

Home Firewall Products

Firewalla: best hardware option which has an easy setup and can protect the whole house easily

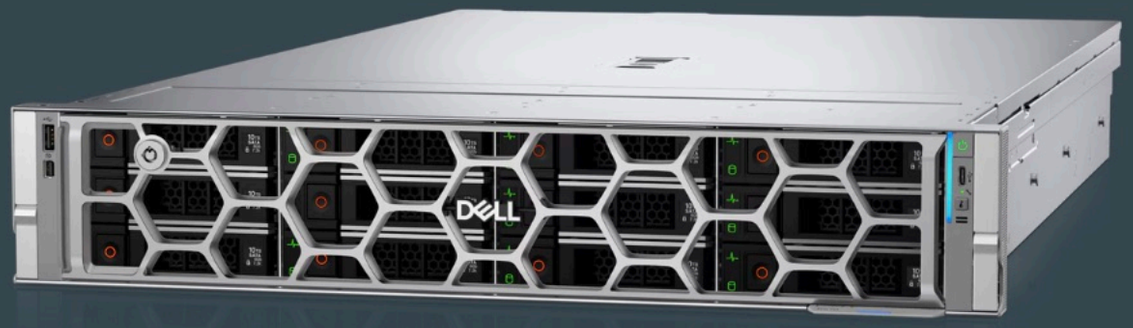
Bitdefender: Also great for home firewall protection which is a good invisible protector

Networking equipment

Ubiquiti: If you want a good looking and used in large homes and offices.

TP-Link(Omada): a cheap good option that is flexible and reliable

Servers



Dell: Best for long term value and ease of use

HPE: best for high density workloads and security built right into their hardware chips.

Wireless Access Point

Ubiquiti (UniFi Series): Small and can be placed anywhere, no subscription fees, and they are the technology leaders using Wi-Fi - 7

TP-Link (Omada Series): Rock solid stability, flexible usage with a phone app or hosting on your computer. Also has great hardware value.
